1. Introduction

The first ICT-AGRI Projects Workshop was held in conjunction with the ICT-AGRI Seminar in Dublin, Ireland on 25-26 February 2016.

The seminar was organised by Teagasc, the Agriculture and Food Development Authority in Ireland, a partner in ICT-AGRI-2. The focus of the seminar was “Shaping the Future: Targeting Opportunities for ICT in Agriculture”. The conference attracted over 300 participants from research, industry and farming, from Ireland and Europe.

The ICT-AGRI Project Workshop took place the day before the seminar, will a full day of activities for project partners. Project representatives were invited to attend the seminar the following day and to present their research at a poster session. Many project partners took part in the general discussions at the conference and there was a keen interest for ICT-AGRI among the conference participants. The keynote speaker Dr John Bell, director of Bioeconomy at the European Commission, acknowledged the work being done in the ICT-AGRI-2 ERA-NET and referred to the successful workshop held in Dublin.

The ICT-AGRI Project Workshop is reported in detail in the following pages.

The coordinators of 25 projects from the 2012, 2014 and 2015 calls were invited to attend. Two members of each project were invited. The representatives of 20 projects attended the workshop, a total of 26 people.

Representatives of ICT-AGRI-2 partners also attended, with 7 people present.

A total of 31 people took part in the activities of the workshop, with two facilitators from Teagasc organising the day.

2. Funded Projects Workshop

The workshop took place on Thursday 25th February 2016 at the Aviva Stadium, Dublin from 09:00 to 17:30, followed by a networking dinner at 19:00 at the Sandymount Hotel, Dublin.

The workshop was organised by Teagasc – the agriculture and food development authority in Ireland, a partner in ICT-AGRI-2 and WP3 lead.

33 people joined the workshop – 26 people from ICT-AGRI funded projects, 7 people from ICT-AGRI-2 partners including 2 facilitators from Teagasc.

2.1. Workshop Programme

The workshop programme was designed with multiple purposes. The Description of Work states:

Networking amongst ICT-AGRI funded researchers

We will establish an “ICT-AGRI Community” amongst the researchers that we have funded, in order to:

- *encourage future collaborations,*
- *mutual learning and*
- *a reduction in duplication of effort.*

Two ICT-AGRI summits will be held during the period of ICT-AGRI-2 (one at midpoint and a second at the end) to bring together all of our funded researchers with industry and other stakeholders. The summit will be linked to a major European conference in a relevant area, so as to obtain maximum value for the travel costs incurred.

The programme of the first workshop reflected these aims, with a focus on networking and mutual learning.

Workshop programme

Project Workshop

25 February 2016

Venue: Aviva Stadium, Entrance A, Vavasour Suite, Lansdowne Road, Dublin

PROGRAMME

Workshop Facilitator Raymond Kelly, Teagasc

- 08:45 Registration
09:00 **Welcome** Iver Thysen
09:15 **Initial results from the Project Partner Survey** Juliana Zweifel

Project Discussions:

Each project hosts a table discussion

Format:

Introduction to the project and consortium, from the project representative

Project outline, from the project representative

Discussion

2.2. Workshop Introduction

Raymond Kelly from Teagasc outlined the structure of the workshop and acted as facilitator for the day.

2.3. Welcome

Iver Thysen has worked in the ICT-AGRI Secretariat at the Danish Agency for Science, Technology and Innovation from the start of the ERA-NET. He welcomed the partners and outlined the purpose of the workshop.

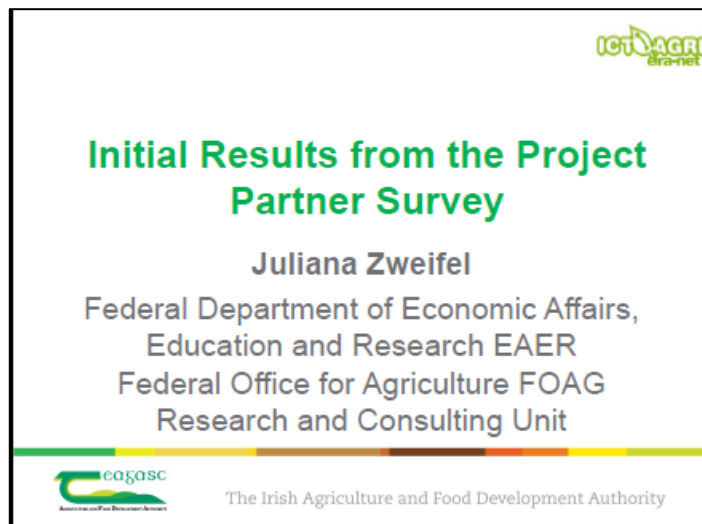

2.4. Impact assessment and evaluation of ERA-NET effectiveness

Juliana Zweifel is working in the Federal Office for Agriculture (FOAG) in Switzerland. She leads WP5 with Markus Lötscher.

The title of her presentation was: Impact assessment and evaluation of ERA-NET effectiveness and she covered the following topics:

- Objectives of the WP “Impact assessment and evaluation of ERA-NET effectiveness”
- Questions to be answered through the WP
- Work conducted so far: impact model, online questionnaire (preliminary results)
- Next steps

2.5. ICT-AGRI Projects Booklet

Each participant received a copy of a new booklet which details all ICT-AGRI funded projects from 2010-2015. The booklet was compiled and edited by Teagasc and is available to download online at:

http://www.teagasc.ie/publications/view_publication.aspx?PublicationID=3889

2.6. Green Agriculture Projects (2012 call) networking session

Each project was allocated a round table. Project partners sat at their allocated table and hosted the discussion. The networking session was divided into two thirty-minute sessions (session 1 and session 2). Each project hosted a table discussion with the following format:

- Introduction to the project and consortium, from the project representative
- Project outline, from the project representative
- Discussion

Project	Session 1	Session 2
FarmFUSE	Abdul Mouazen	Abdul Mouazen
Grass Bots	Claus Grøn Sørensen	--
SILF	--	Claus Grøn Sørensen
ICTGRAZINGTOOLS	Bernadette O'Brien	Bernadette O'Brien
i-LEED	Benjamin Seiferth	Benjamin Seiferth
ITApic	Aleksejs Zacepins	Aleksejs Zacepins
USER-PA	Soren Marcus Pedersen	Soren Marcus Pedersen

2.7. Smart Agri Food Projects (2014 call) networking session

Each project was allocated a round table. Project partners sat at their allocated table and hosted the discussion. The networking session was divided into two thirty-minute sessions (session 1 and session 2). Each project hosted a table discussion with the following format:

- Introduction to the project and consortium, from the project representative
- Project outline, from the project representative
- Discussion

Project	Session 1	Session 2
FERIA, FI-ORAMA	Claus Grøn Sørensen	--
S-GAP	--	Claus Grøn Sørensen
HappyCow	Sicco Pier van Gosliga	Sicco Pier van Gosliga
ifarma-ffa	Vangelis Vassiliadis	Vangelis Vassiliadis

2.8. Precision Farming Projects (2015 call) networking session

Each project was allocated a round table. Project partners sat at their allocated table and hosted the discussion. The networking session was divided into two thirty-minute sessions (session 1 and session 2). Each project hosted a table discussion with the following format:

- Introduction to the project and consortium, from the project representative
- Project outline, from the project representative
- Discussion

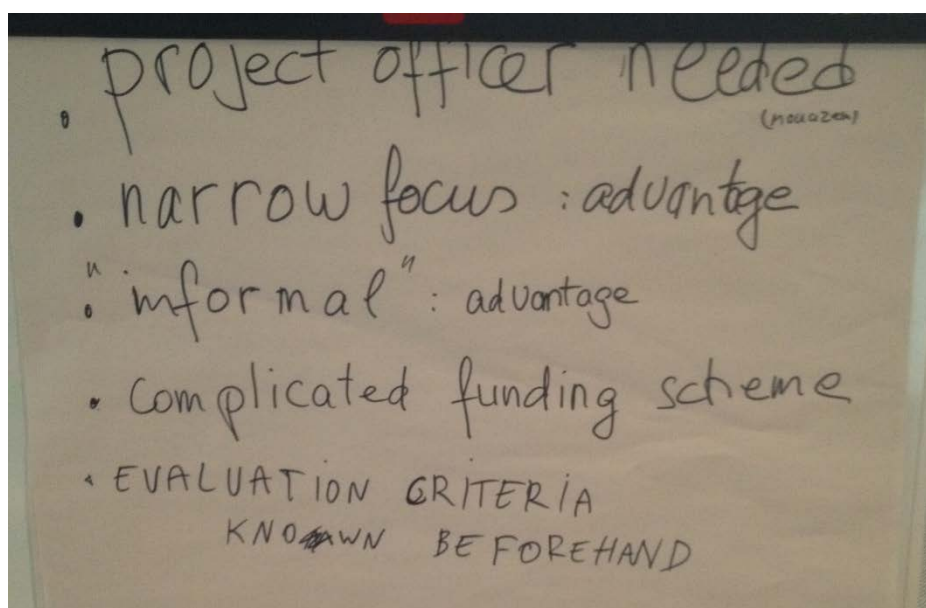

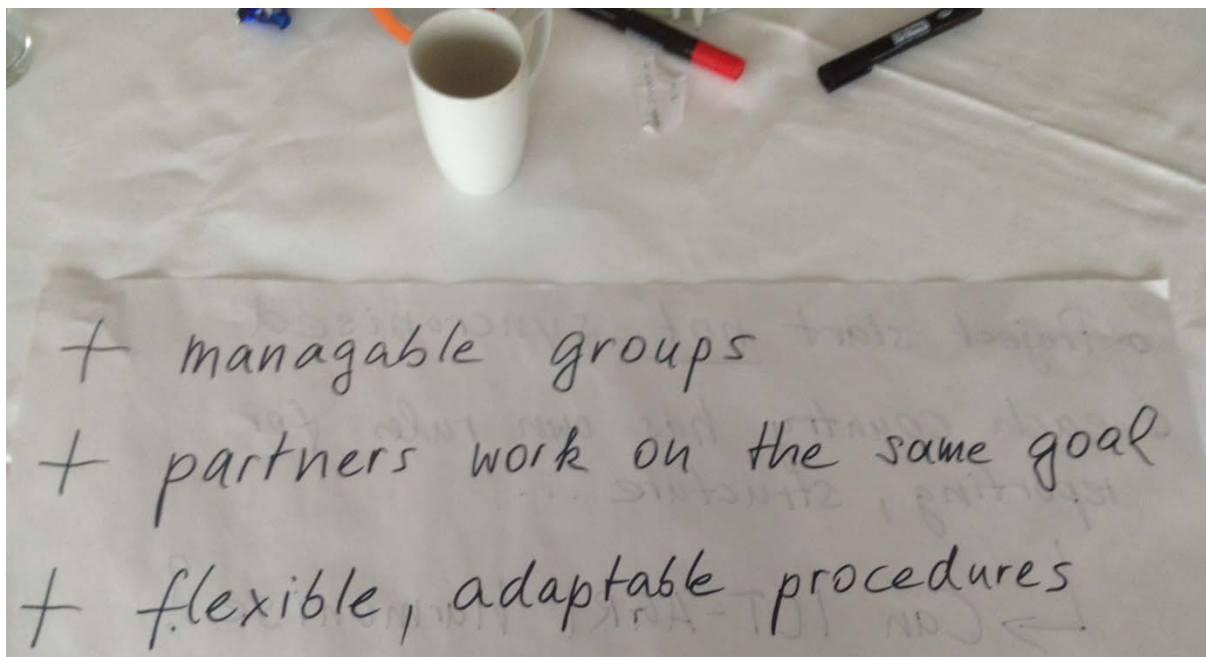

Project	Session 1	Session 2
DockWeeder	Frits van Evert	Dejan Seatovic
GeoWebAgri II	Dionysis Bochtis	Dionysis Bochtis
PAMCoBA	Soren Marcus Pedersen	Soren Marcus Pedersen
S3CAV	Michael Nielsen	Michael Nielsen
Targ_App	Kathrine Hague Madsen	Bo Stenberg, Pertti Rajala
VAROS	Dejan Seatovic	Claus Grøn Sørensen
GrassQ	Bernadette O'Brien	Christina Umstatter
CTF-Optimove	Claus Grøn Sørensen	Dermot Forristal

2.9. Workshop Question 1

Project partners were invited to sit at tables numbered 1-6. The groups discussed the following question:

What did you learn? Any tips for new projects?

Each group wrote notes on a flipchart. Once the group had answered the question, participants were invited to move to another table. Once at a new table, the participants continued the discussion with the new group.

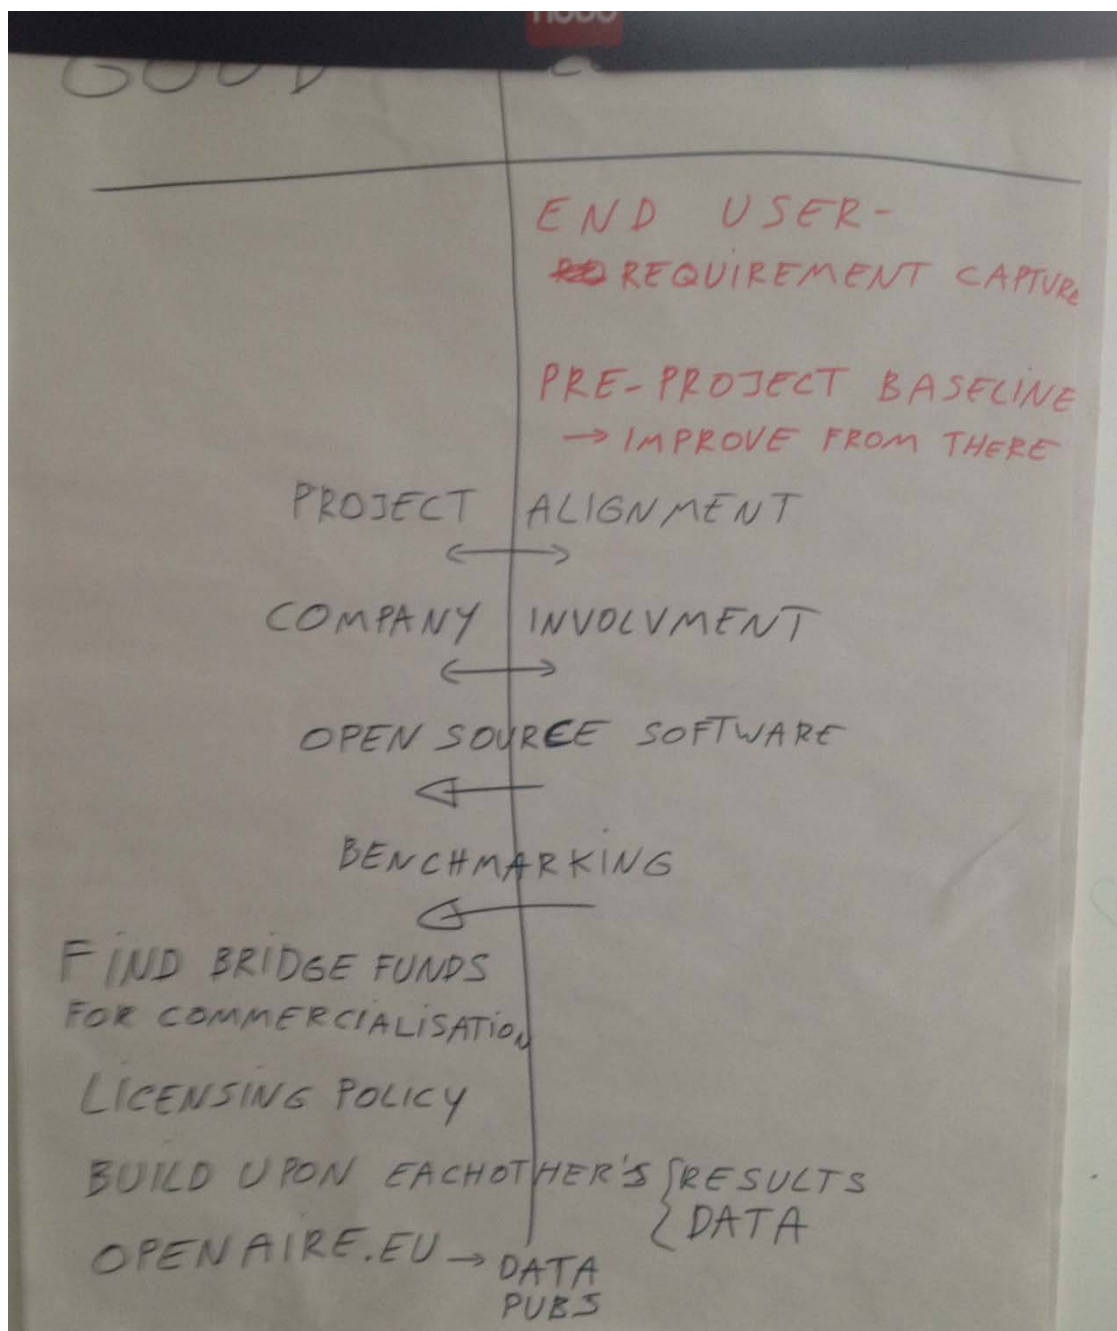

- o Project start not synchronised
- o each country has own rules for reporting, structure ...
 - ↳ Can ICT-AGRI harmonise?
 - ↳ if not, all partners need to know about requirements before project planning

- 1/ DATA HANDLING PROBLEMS
 - NO STANDARDS FOR DATABASE
 - *BIG DATA - EARLY STAGE. 14
 - 2/ I.P. + LEGAL ISSUES → PROBLEMATIC
 - FLEXIBLE I.P. FRAMEWORK NEEDED
 - CAN ICT-AGRI DEVELOP
 - WHO OWNS 'DATA.' (INSTRUMENT OWNERS?)
 - 3/ FUNDING - SCHEDULING
 - BRINGING PRODUCT TO MARKET.
 - 4 YEAR PHDS + TIME FRAME.
 - *PROJECT SELECTION + POOR FUNDING MATCH
- Positives:
- + 'COLLABORATION WORKS'! →
 - + 'BETTER' THAN LARGE EU PROJECTS.
 - + ICT-AGRI → BRINGS 'ACTIVE' GROUPS TOGETHER.

GOOD

BAD

2.10. Workshop Question 2

Project partners were invited to sit at tables numbered 1-6. The groups discussed the following question:

What is your route to market?

Each group wrote notes on a flipchart. Once the group had answered the question, participants were invited to move to another table. Once at a new table, the participants continued the discussion with the new group.

The groups discussed this topic for one hour.

2.11. Workshop Question 3

Project partners were invited to sit at tables numbered 1-6. The groups discussed the following question:

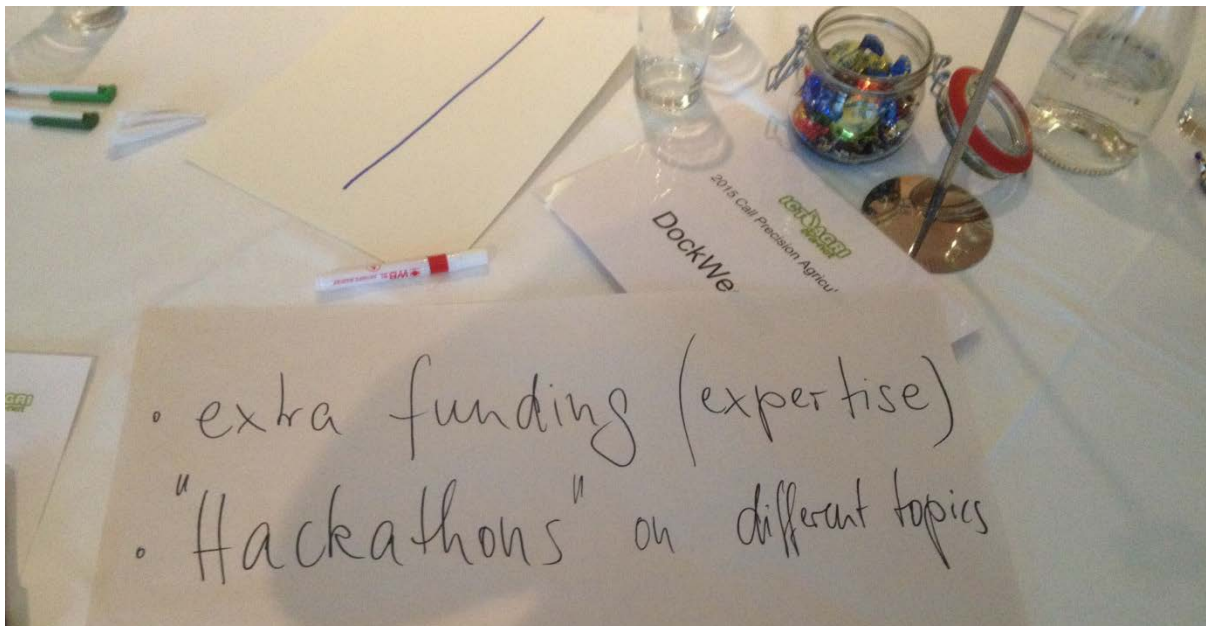

***Future collaboration – what expertise is your consortium lacking?
What can ICT-AGRI do in this respect?***

Discussion on opportunities for future collaboration

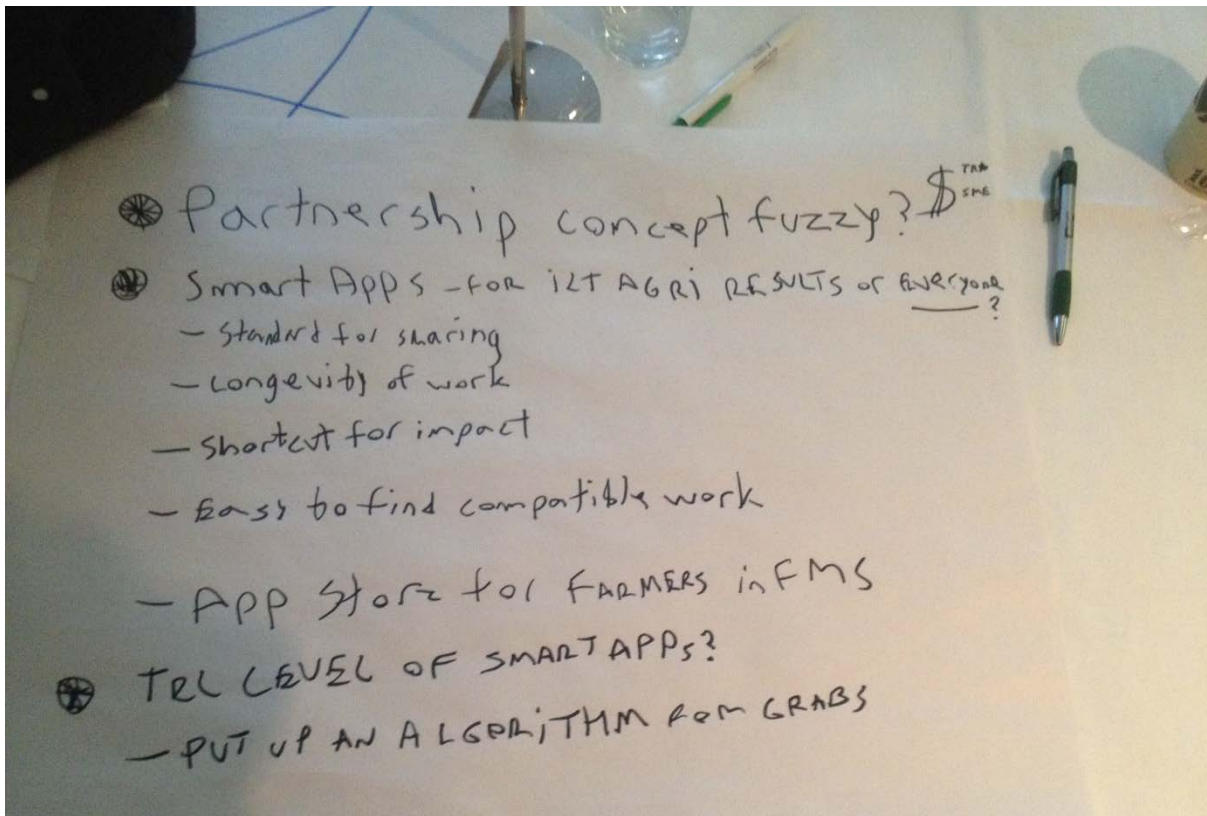

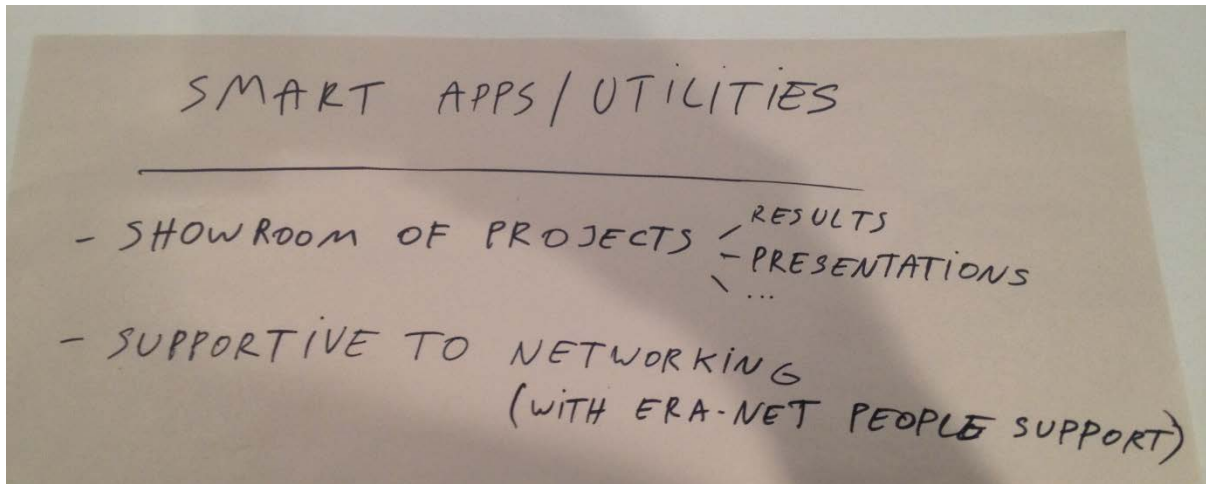

- ***2016 call***
- ***Smart Apps and Utilities items on ICT-AGRI website***

Each group wrote notes on a flipchart. Once the group had answered the question, participants were invited to move to another table. Once at a new table, the participants continued the discussion with the new group.

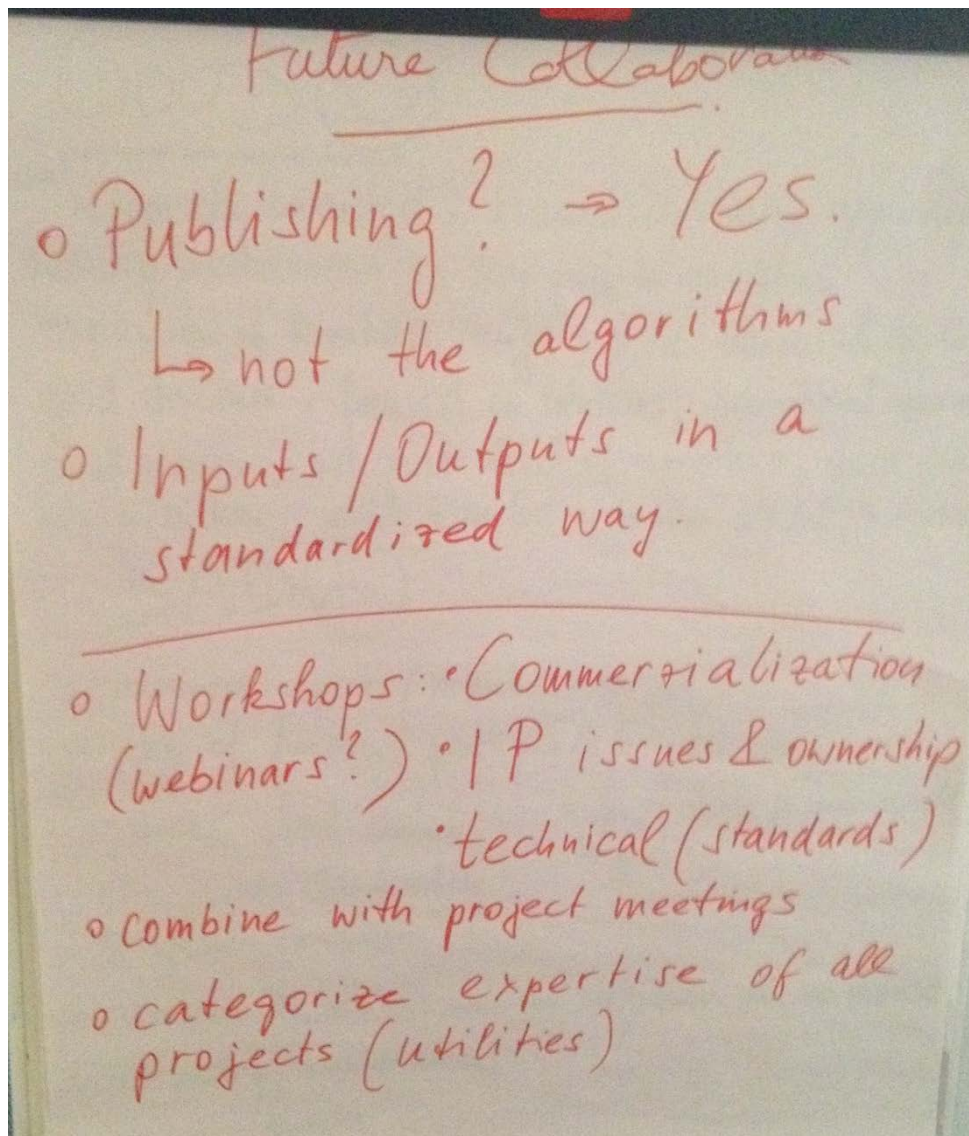

What can ICT-AGRI do?

Smart Apps / Utilities

Future Collaboration

Expertise

Frits van Eert	data mining
MICHAEL NIELSEN	Precision Ag. field trial / Agronomist owning equipment and fields for access to.
CHRISTINA UMSTÄTTER	KNOWLEDGE ON IP-AGREEMENTS DATA MINING / TIME SERIES
DERMOT FORRISTAL	(FUTURE) IMAGE ANALYSIS EXPERT TO I.D CROP GROWTH STAGES / SHOOT NOS IN CEREALS. FOR SMART APP SYSTEM.

BERT BECK	VARIABLE RATE CROP PROTECTION
Henri Holsten	• Big data analysis / modelling (pre-farming individual) • Infrastructure - open data thinking....
JP CHAVET	Economic and Social impacts of robots

2.12. Workshop evaluation

All participants were encouraged to complete the workshop evaluation sheet. The results of the evaluation are presented in Chapter 3.

2.13. Next steps and closing remarks

Iver Thysen thanked the projects for attending the workshop and encouraged participants to review the 2016 call details on the ICT-AGRI website.

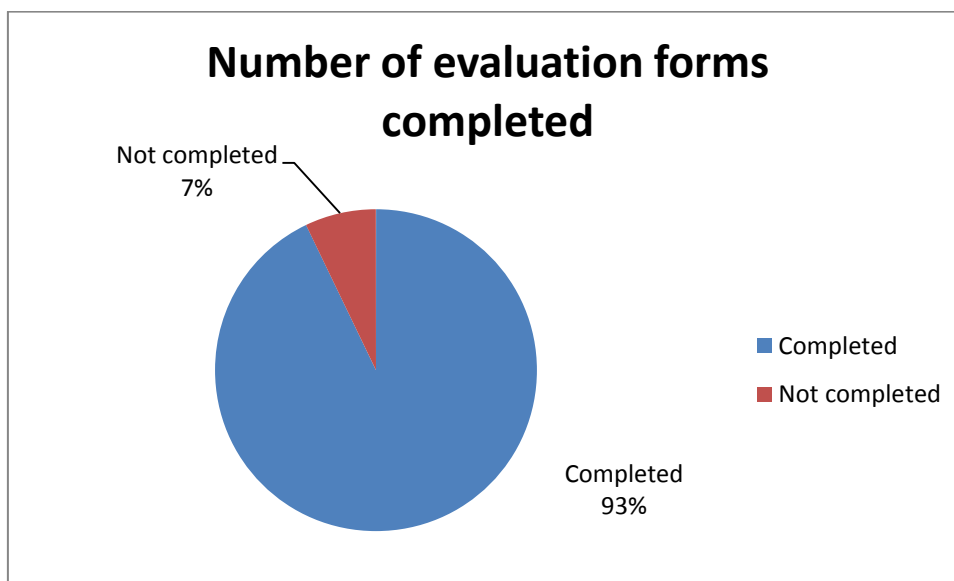

2.14. Networking dinner

28 project partners and ICT-AGRI partners attended a networking dinner at the Sandymount Hotel in Dublin, close to the workshop venue.

3. Workshop Evaluation

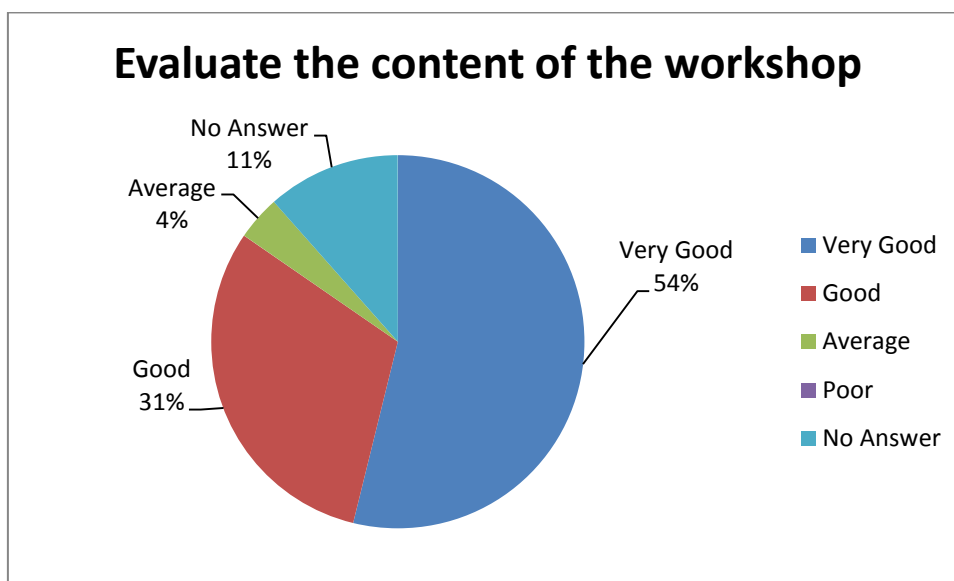

3.1. Number of workshop participants

- 33 people attended the workshop
- 2 people were workshop facilitators/organisers and did not complete the evaluation
- 31 people were eligible to complete the evaluation
- 3 people left early
- 28 people attended the evaluation session
- 26 completed evaluation forms were received

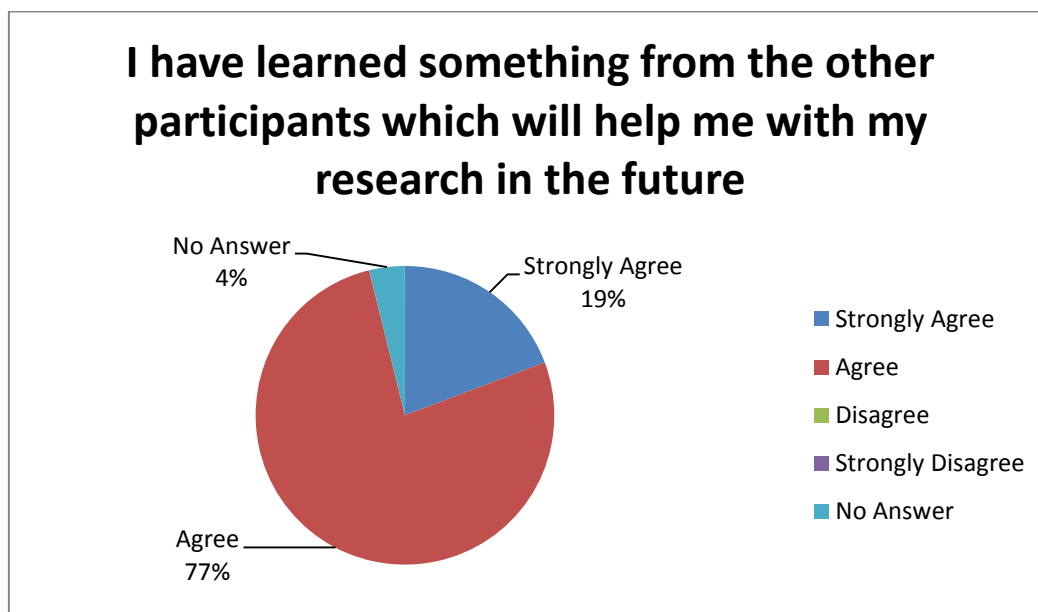

3.2. Content

Over 85% of responses noted the content as Good or Very Good.

3.3. Impact

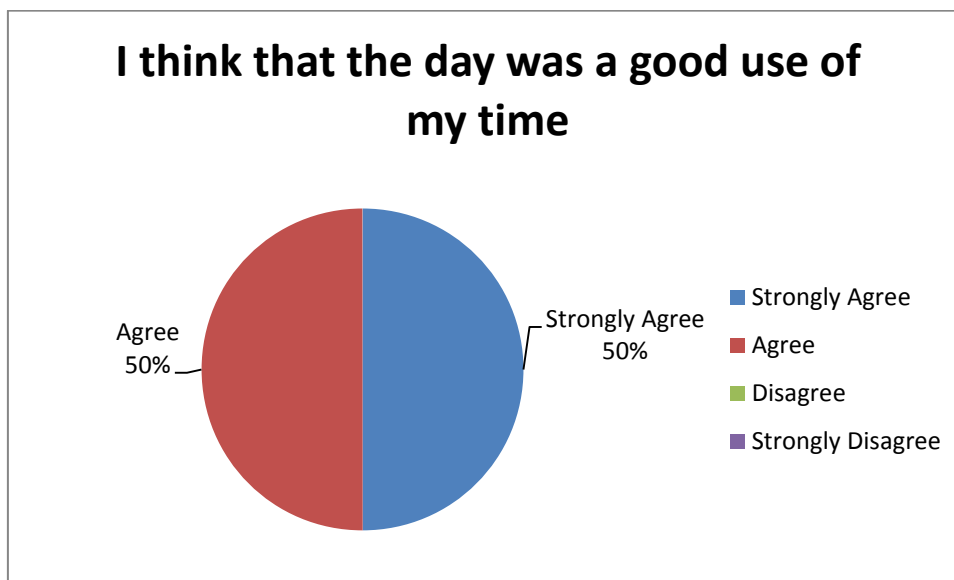

96% of participants learned something from the other participants which will help with their research in future.

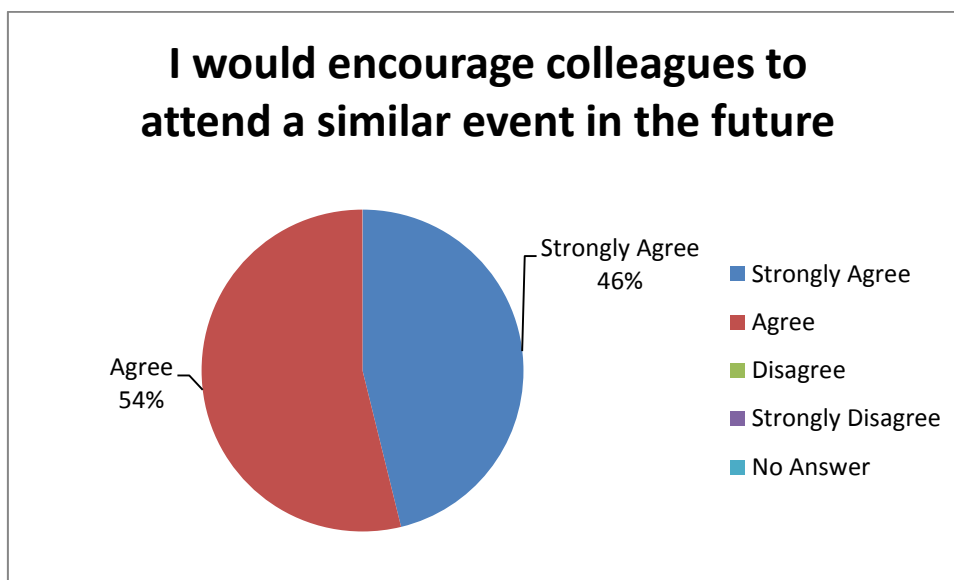

96% of participants made contact with another researcher who they did not know before the workshop and with whom they could pursue a collaboration in future.

100% of participants thought the day was a good use of their time.

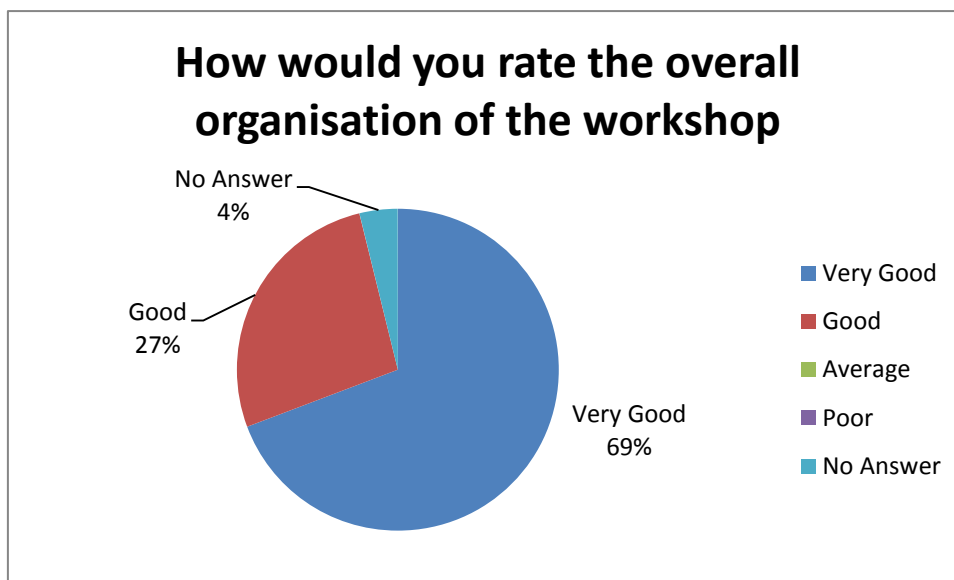

100% of participants would encourage colleagues to attend a similar event in the future.

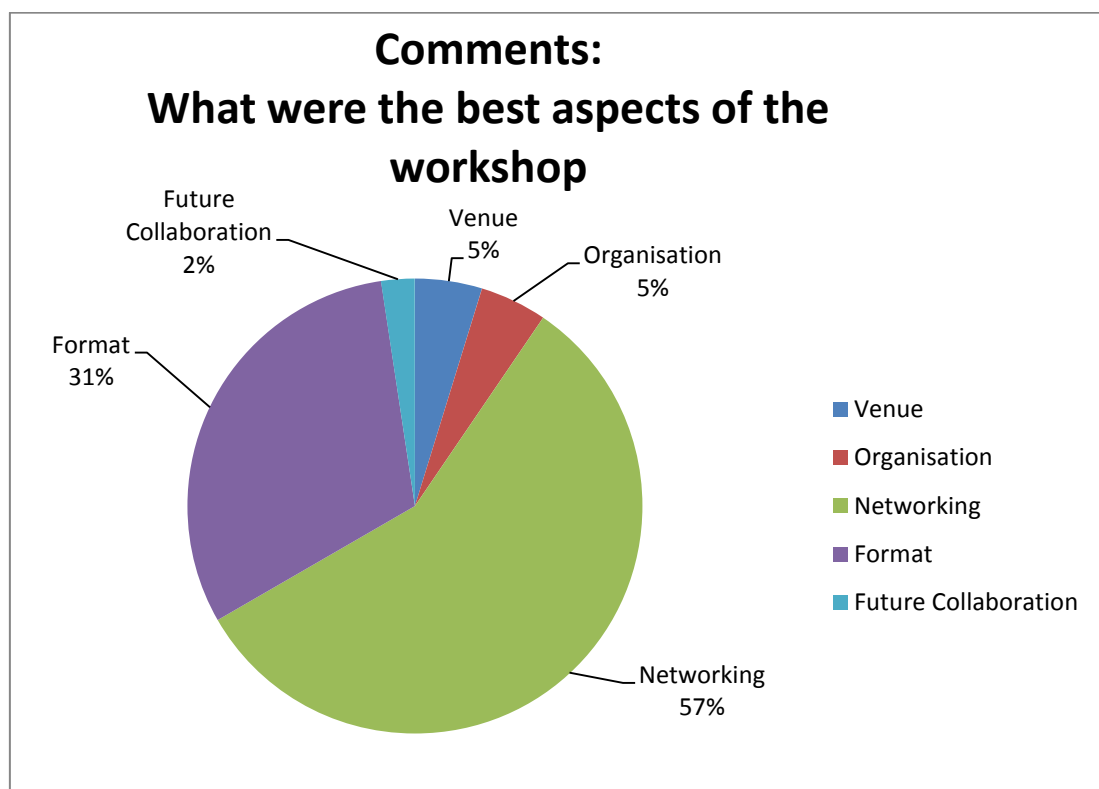

3.4. Organisation

96% of participants rated the overall organization of the workshop as Good or Very Good.

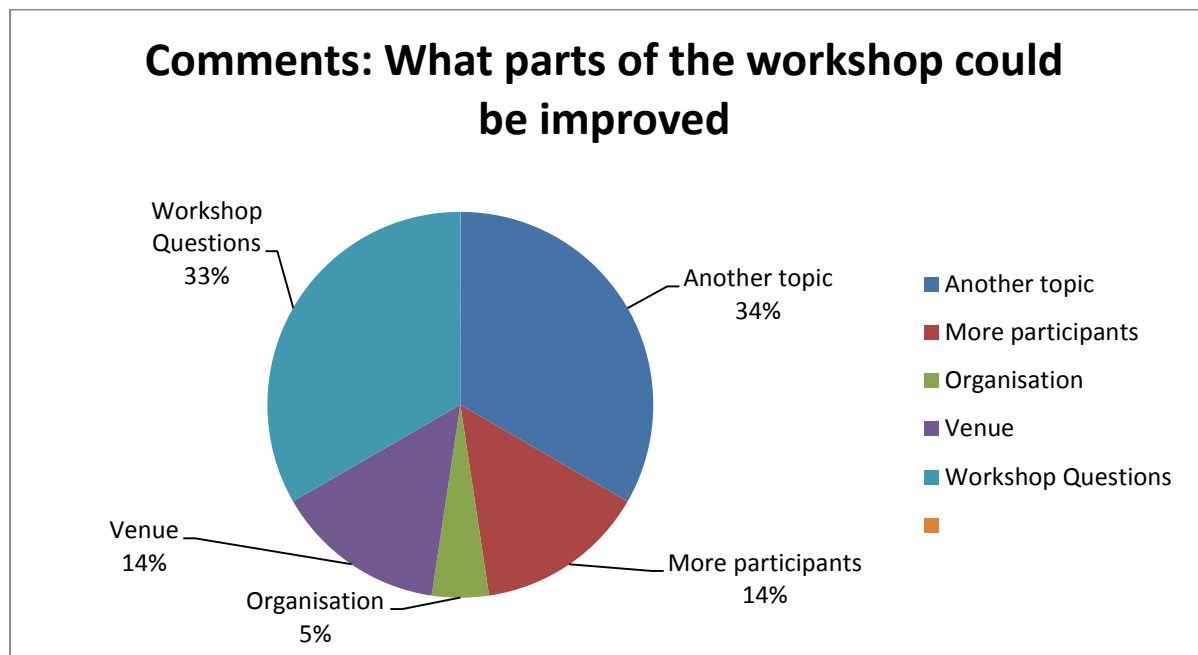

3.5. Positive aspects of the workshop

Comments:

What were the best aspects of the workshop?	
Identifying future collaborations	Approach, discussion, workshop interactivity
All worked well	Better than traditional presentations
Brainstorming, information sessions and project goals explanations	Learned about the other ICT-AGRI projects
Fun way to force us to mingle	Networking
Good planning of the day	Networking
It had short events, easy and not long to follow	Networking
Style	Nice way to share ideas and experiences
The format	Projects contents elaboration
The structure guaranteed interaction, participation and meeting new people	Round table discussions
Time schedule was followed	Round table discussions
Topics for discussion was good	Speed dates on projects
Well organised with a good facilitator	The interaction between participants
Interaction with partners	The networking and getting different views as opposed to powerpoint presentations
Interactive, open round-table	The participants were relaxed and fun to converse with
Interactive. Good way of getting to know each other	The project round tables and the networking
It was beneficial to meet the people behind the other projects. Very useful	To know other participants of ICT-AGRI
Discussions and mixing people	To meet other researchers in the field of ICT-AGRI
Discussions went well	Good guidelines for registration and travelling
Finding out what is going on in other projects	Organisation was good
Inter-project collaboration	Nice venue
Knowing of other projects with similar objectives but different methods	Place was good

3.6. Improvements

What parts of the workshop could be improved?
Maybe an update on a few areas relevant to all projects by ICT-AGRI, e.g. IP or progress in different areas, requirements in proposals
I think narrowing the focus on one or two aspects would perhaps give better "results" in the end
Project management tools
Discussion of new calls
Presentation of the single projects for the whole group, to get a clearer picture of all of them
Maybe speed date (5 minutes per project) followed by more in detail
More project partners allowed (in agreement with project coordinators).
Also beneficial for administrative persons but more researchers and SME partners would be great
Should be more people invited
More info about what we had to prepare in advance. I made a ppt but that I learned did not need to be used
A little bit cold in the room
Sodas/water for lunch would be nice
Lunch was limited and strange to only have only coffee
Some discussions were too lengthy
The workshop questions. I don't think the circulation in the second half was very fruitful.

What parts of the workshop could be improved?
Last question of the day was surprisingly hard to answer: missing expertise? But maybe it was just the time of the day.
Less cycling
There was a bit too much shuffling among tables
Feedback from all five groups was a bit much
It flagged at the end due to "fuzziness" of last topics

3.7. Comments

Any other comments
Please share the pictures with us
Thank you for organising the event
I enjoyed the workshop a lot
Have the next workshop in parallel activity of major industry event, e.g. Agritechnica
Combine individual kick-off meetings with this workshop. Since we all need to hold our kick off meeting and travel anyway
Well done
ICT-AGRI should organise some technical workshop or field demonstrations of cutting-edge technologies
The workshop questions
Blue buses (Aircoach) should have an announcement for stations
A link to the difference in electricity plugs (in Ireland)

4. Images from the workshop

5. ICT-AGRI participation in ICT-AGRI Seminar

The ICT AGRI Seminar took place on Friday 26th February 2016 at the Aviva Stadium, Dublin. Over 250 guests from Ireland and Europe attended the seminar. It was organized by Teagasc, partner in ICT-AGRI-2 ERA-NET. ICT-AGRI partners who attended the workshop were also encouraged to attend the seminar and to present their research in a poster session. The poster session was well attended with a lot of interest during the day.

09:00 Registration

Morning Session - Chaired by: Paddy Browne, Teagasc

Opening

09:30 Prof Gerry Boyle, Director, Teagasc

10:00 Dr John Bell, Director of Bioeconomy, European Commission

Farming

10:30 ICT/E-Agriculture Challenges & Opportunities On A Modern Irish Tillage Farm Operation

Kevin Nolan, Nolan Farming

10:50 Smart Farm Management

Jason Devenney, FarmFlo

11:10 Tea/Coffee Break, Networking in Exhibition Area

Industry

11:40 Smart Agri

Vincent McKey, IBM

12:00 Milking more than milk from cows

Dr John Daly, Dairymaster

12:20 Using technology to provide key advice to farmers to enable better decisions

Gerard Keenan, Keenan Systems

12:40 Industry Panel Q+A

Afternoon Session - Chaired by: Dr Frank O'Mara, Teagasc

Research

14:00 Realising the Potential from ICT in Agriculture

Dr Laurence Shalloo, Teagasc

14:20 Sensor-based integrated farm management: challenges and benefits

Prof Willie Donnelly, TSSG, Waterford Institute of Technology

14:40 Enabling Growth in Agri-Foods through sensor technologies

Dr Kieran Drain, Tyndall National Institute

15:00 Opportunities for agriculture through data analytics

Prof Mark Keane, INSIGHT Centre

15:20 Research Panel Q+A

15:40 Tea/Coffee Break, Networking in Exhibition Area

Funding

The Importance of Smart Agri and Future Opportunities

16:00 Dr Iver Thysen, ICT-AGRI-2 ERA-NET

16:10 Richard Howell, Department of Agriculture, Food and the Marine

16:20 Dr Darrin Morrissey, Science Foundation Ireland

16:30 Funding Panel Q+A

Closing

16:45 Dr Frank O'Mara, Director of Research, Teagasc

17:00 Networking in Exhibition Area - view funded transnational projects from ICT-AGRI ERA-NET

Foreword

Shaping the Future: Targeting Opportunities for ICT in Agriculture *Where are we now and where are we going?*

Three of the four Teagasc goals focus on improving the competitiveness of agriculture, food and the wider bioeconomy; supporting sustainable farming and the environment and encouraging diversification of the rural economy. Given the very significant global and local challenges which we face in terms of climate change, food security and concentration of economic activity in urban areas, it is vital that we harness the potential of ICT to transform the agri-food sector and rural economies.

The application of information and communications technologies offers the potential to reduce inputs, including farmers' own time, and simultaneously to increase outputs. The optimal deployment of these digital technologies will be key to achieving our aim of sustainable intensification of agriculture. ICT also offers great possibilities for the renewal of rural economies, both through the increased competitiveness and sustainability of agriculture and also through the opening up of new business models which are more suited to areas of lower population density.

Teagasc has a long history of embracing new technologies and has already been very active in promoting the synergy between digital technologies and agri-food, through our membership of the ICT-AGRI ERA-NET. We are very pleased to have developed strong collaborations with leading Irish research institutions and groups and look forward to hearing from the leaders of some of these institutions today.

The Teagasc model of innovation support is one where stakeholders are key participants in an increasingly open system of innovation. This means that end-users should be involved throughout the innovation process. To this end, we are pleased to bring together representatives from the farming sector, industry, research and research funders to identify the current state of the art, address upcoming challenges and look to future opportunities.

I would like to thank all of the speakers who contribute here today and you, the attendees, for your active engagement.

Professor Gerry Boyle
Teagasc Director

ICT-AGRI funded project partners and ICT-AGRI-2 partners attended the ICT-AGRI Seminar

L-R: Prof Gerry Boyle, Director, Teagasc; Richard Howell, Department of Agriculture, Food and the Marine, Ireland; Dr John Bell, Director of Bioeconomy, European Commission; Dr Frank O'Mara, Director of Research, Teagasc

Dr John Bell, Director of Bioeconomy, European Commission gave the keynote address

L-R: Dr Raymond Kelly, Teagasc and ICT-AGRI-2, with guests during ICT-AGRI Seminar

Research Support Office Staff, Teagasc

L-R: Dr Kim Reilly, Stephen McHugh, Antoinette Jordan (ICT-AGRI-2 Research Officer), Dr Raymond Kelly (ICT-AGRI-2 Partner), David Whelan, Philomena Haughney

6. Conclusions

The first ICT-AGRI funded projects workshop was well attended and received positive feedback. The work of the ICT-AGRI ERA-NET was significantly exposed at the ICT-AGRI Seminar through the poster session of ICT-AGRI funded-projects and from being highlighted by Professor Gerry Boyle, Director, Teagasc and Dr John Bell, Director of Bioeconomy, European Commission in their speeches. ICT-AGRI has thereby achieved a considerable recognition in the Irish and European community of researchers and developers within ICT and robotics for agriculture.

The experiences from this workshop and seminar - together with experiences from other major agricultural conferences – indicate that collaboration with events in the community is a very important method for raising awareness among the stakeholders. It is therefore recommended to continue such efforts also in ICT-AGRI-2. A second workshop for funded projects is planned for 2017.

Technology has the potential to revolutionise Irish Agriculture

THE Teagasc ICT Agri Seminar opened in Dublin on Friday, 26th February. Speaking in the Aviva Stadium, Professor Gerry Boyle Director of Teagasc said: "ICT and digital technologies have transformed many sectors of our economy and of our lives, from transport, logistics and manufacturing to music and books. The same potential exists in the agriculture sector. Digital Technologies for Sensing, Analytics and Automation are some of the key emerging technologies with the potential to revolutionise the future of Irish agriculture. Already some of that potential is being realised, as shown here today. But this is only a taster of what could be achievable in the future."

Today's event has brought together end users, industry, research performers and research funders, to identify the current state of the art technologies in use, address upcoming challenges and look to future opportunities.

In recent years, Teagasc has put in place a number of key building blocks which will provide a basis for future development of digital agriculture solutions in Ireland.

These include the Teagasc National Farm Survey, PastureBase Ireland, Soils Information System and Teagasc NMP-online.

As well as developing the building blocks for future solutions, Teagasc has developed a series of partnerships with complementary groupings like the Irish Cattle Breeding Federation (ICBF), Tyndall National Institute, and the Waterford Institute of Technology's

Telecommunication Software and Systems Group (TSSG).

Teagasc's membership of the ICT-AGRI Era-NET has been a major catalyst for the development of research lines in the area of digital agriculture. The grouping of research funders and leading research performers from across Europe has allowed Teagasc to tap into high level expertise and to contribute to a European Strategic Research Agenda in this area.

Farming world

Ray Ryan

IT to 'revolutionise' agriculture: Teagasc

Technology has the potential to revolutionise Irish agriculture, Teagasc director Professor Gerry Boyle, has told a seminar in Dublin.

He said information and communications (ICT) and digital technologies have transformed many sectors of our economy and our lives from transport, logistics and manufacturing to music and books.

"The same potential exists in the agricultural sector," he told the Teagasc ICT agri seminar at the Aviva Stadium.

Professor Boyle said digital technologies for sensing, analytics and automation are some of the key emerging technologies with the potential to revolutionise the future of Irish agriculture.

"Already some of that potential is being realised, as shown at the seminar, but this is only a taster of what could be achieved in the future," he said.

The event brought together end users, industry, research performers and funders to identify the current technologies in use, address upcoming challenges and look to future opportunities. Teagasc has put in place a number of key building blocks to provide a basis for future development of digital agriculture solutions.

diary dates

Today

■ The IFA presidential and deputy candidates debates continues, with a meeting at 8pm in Breaflly House, Castlebar, Co Mayo.

■ A spring grazing beef walk will take place at 11am at Teagasc, Grange, Dunsany, Co Meath.

Wednesday, March 2

■ Teagasc college open days are getting underway with Mounthbellew Agricultural College in Galway opening its doors from 10am, while Kildalton College in Piltown, Co Kilkenny will stage its open day on Friday.

Thursday, March 3

■ Quinns of Baltinglass are marking 80 years in business with a tillage conference at the Clanard Court Hotel, Athy, Co Kildare from 7pm. Speakers include Shay Phelan of Teagasc, Dr Tomas McCabe from UCD, Kieran McDonnell from Grassland Agro and Phelim Dolan from Comex McKinnon.

Tuesday, March 8

■ A Teagasc Technology Foresight Conference examining innovations for the agri-food sector takes place at the Aviva Stadium from 9.30am. Registration required.

Thursday, March 10

■ An organic demonstration farm walk will take place on the farm of beef producer John Purcell in Ross, Golden, Co Tipperary from 11am

Teagasc ICT seminar in Aviva

TEAGASC hosts an ICT Agri Seminar this Friday, 26th February in the Aviva Stadium, Dublin. The theme for the event is 'Shaping the Future: Targeting Opportunities for ICT in Agriculture -Where we are now and where are we going?'

Director of Research in Teagasc, Dr Frank O'Mara said: "There is a lot of interest in the opportunity to respond to key challenges, from food security to climate change, by enhancing the role of ICT and robotics in sustainable agriculture. This seminar will showcase what Ireland is doing in this space and will allow Irish researchers, farmers and industry to interact with European experts in the area. It is an important initiative as we seek to bring together the ICT and agriculture communities."

The keynote address at the seminar will be delivered by Dr John Bell, Director of Bioeconomy at the European Commission in Brussels. He will address the issues, challenges, and opportunities for ICT-AGRI in Ireland and Europe. The seminar will bring together farmers, industry, research and funding partners from Ireland and Europe.

Antoinette Jordan, Teagasc researcher, said: "This event will provide networking opportunities for researchers, industry and the farming sector and will include a showcase of 25 transnational projects in the area of ICT and agriculture, which have been funded by the EU through the ICT-AGRI ERA-NET."

European researchers will showcase projects on topics including: ICT and Automation for a Greener Agriculture; Services & Applications for Smart Agriculture;

Enabling Precision Farming. To see the full programme visit <http://www.teagasc.ie/>

WEEKLY

AGRI EVENTS

Today, February 25

Teagasc winter crop walk at DAFM Farm, Ballyderown, Fermoy, Co Cork (winter barley advice, fertiliser and fungicide advice for winter crops)

Teagasc Pig Seminar, due to run from 2pm to 4pm at Teagasc, Ballyhaise Agricultural College, Co Cavan

Friday, February 26

Teagasc ICT agri-seminar, full programme at www.teagasc.ie/events/2016/20160226.asp

Corrin Mart dairy heifer show (10am) and sale (11am)

Sunday, February 28

Point to point horse racing at Bandon (1.30pm), Co Cork; Killaloe, Co Clare; and Bennettsbridge, Co Kilkenny.

Monday, February 29

Cork Holstein Friesian Club high quality spring heifer show and sale, Bandon Mart, 12 noon

South Tipperary IFA Election Debate, 8pm, Cahir House Hotel

Tuesday, March 1

Spring grazing beef walk at Teagasc offices, in Grange, Dunsany, Co Meath

Wednesday, March 2

Mountbellew Agricultural College open day, Co Galway, 10am-3pm

Friday, March 4

Kildalton Agricultural & Horticultural College Open Day, 10am-1pm, Piltown, Co Kilkenny

Tuesday, March 8

Teagasc Technology Foresight Conference, 9am, Aviva Stadium Conference Centre, Dublin, details on www.teagasc.ie/event

Thursday, March 10

Organic beef farm demonstration walks, 11am, John Purcell, Ross, Golden, Co Tipperary.

Teagasc College of Amenity Horticulture Open Day, which runs from 2-4.30pm, National Botanic Gardens, Glasnevin, Dublin 9

Wednesday, March 16

Gurteen Agricultural College open day, 10:30am-2pm, Ballingarry, Roscrea, Co Tipperary

Teagasc Clonakilty Agricultural College open day, 11am-2pm, Darrara, Clonakilty, Co Cork

■ Send event details to farm.ed@examiner.ie or Irish Examiner, Linn Dubh, Assumption Road, Blackpool, Cork.

DIARY DATES

Feb 17th –
Feb 26th

February 17th / 18th

QB Oils Spring Farm & Construction Machinery Show taking place in Eikon Exhibition Centre, Balmoral Park, Lisburn. Call 048 82252800 for more information.

February 18th

Farm Partnerships Seminar to be held in Hotel Kilkenny. The Cillin Farm Advisory group will be holding a seminar on farm partnerships.

February 19th

Embrace Farm Open Information Evening. This event is to be held in Mullingar Park Hotel and farmers can hear stories of loss and bereavement over a cup of tea.

February 23rd

National Potato Conference will be taking place at Red Cow Moran's Hotel and for more information you can call Elaine Farrell on 01-4500266

February 24th

Agricultural Ecosystem Health. Room G-08, Agri Food & Science Centre UCD. Dublin 4. Free entry but prebooking is necessary. Call 01-7167192.

February 24th

Animal Welfare Officer Training Course. A one day work shop with a high degree of delegate participation and interaction making use of the principles of accelerated learning (delegate numbers 20 max). www.teagasc.ie

February 25th

Winter Crop Walk on DAFM Farm, Ballyderown, Fermoy, Co. Cork Get an insight of the BETTER farms and their interaction with Precision Farming and meet the farmers, advisers, specialists and researchers.

February 26th

ICT-AGRI where farmers, industry, research and funding partners will explore the issues, challenges and opportunities for ICT-AGRI in Ireland and Europe. Aviva Stadium Dublin.

If you are organising an event that you would like included in Diary Dates, please e-mail details to info@farmandplant.ie at least a month in advance of the event to ensure publication.

WEEKLY

AGRI EVENTS

Today, February 11

IFA President and Deputy President election debate, 8pm, Lawlors Hotel, Dungarvan, Co Waterford

Sunday, February 14

Point to point horse racing, Knockanard, Fermoy, Co Cork.

Monday, February 15

IFA President and Deputy President election debate, 8pm, GAA Complex, Mallow, Co Cork

Climate change and its impact on Irish agriculture, Agricultural Science Association afternoon forum, The Horse & Jockey Hotel, Co Tipperary, 12.30pm- 4.30pm, fee is €30 for non-ASA members. More information: www.asaireland.ie

Teagasc Hill Sheep National Conference 2016, 5pm, Jacksons Hotel, Main Street, Ballybofey, Co Donegal

Tuesday, February 16

Learn to combine ICT and rural agriculture

WICKLOW farmers are urged to attend a seminar taking place in the Aviva Stadium which will showcase how information and communications technology (ICT) is key to rural development.

Teagasc has organised the seminar titled 'Shaping the Future: Targeting Opportunities for ICT in Agriculture: Where we are now and where are we going?' which takes place on Friday, February 26.

Teagasc research director Dr Frank O'Mara said: "There is a lot of interest in the opportunity to respond to key challenges, from food security to climate change, by enhancing the role of ICT and robotics in sustainable agriculture.

"This seminar will showcase what Ireland is doing in this space and will allow Irish researchers, farmers and industry to interact with European experts in the area.

'It is an important initiative as we seek to bring together the ICT and agriculture communities.'

The keynote address at the seminar will be delivered by Dr John Bell, Director of Bioeconomy at the European Commission in Brussels. He will address the issues, challenges, and opportunities for ICT-AGRI in Ireland and Europe. The seminar will bring together farmers, industry, research and funding partners from Ireland and Europe.

European researchers will showcase projects on topics including ICT and Automation for a Greener Agriculture, Services and Applications for Smart Agriculture and 25 EU-funded transitional projects.

Investment is key to innovation, Hogan tells ICT-agri conference

— Katherine O'Leary

"Ní neart go cuir le chéile" was the motto that EU Agriculture Commissioner Phil Hogan invoked when addressing the ICT-Agricultural Conference in Kilkenny Castle last Friday.

He stressed the importance of collaboration in facing new challenges and opportunities in the agri-tech and agri-food sectors "to deliver more food, more solutions and more wealth".

He said investment was the key to innovation in the sector and stated that there was "€3.6 billion available via Horizon 2020 and the European Innovation Partnership for Agricultural Productivity and Sustainability".

Information communication technology (ICT) is increasingly important to all sectors of the economy. The conference was organised by Waterford Institute of Technology's (WIT) Telecommunications, Software and Systems Group (TSSG).

The aim of the conference was to generate industry-wide support for a national strategy to encourage the research and development of appropriate ICT solutions for the agri industry.

Commissioner Hogan said that products and apps have been developed for virtually every other economic sector – improving efficiencies and making work smarter, and he hoped that new collaborations would "enable farmers to do their work more smartly, and more efficiently".

The result would be "improved quality of crop production". Prof Willie Donnelly, Waterford Institute of Technol-

ogy president and founder of Telecommunications Software & Systems Group (TSSG) with Commissioner Phil Hogan.

duction, quality of livestock health but also, crucially, quality of life for farmers."

Professor Willie Donnelly, president WIT and director TSSG, said that common opportunities from both the agricultural and ICT industries can be identified.

"The key emerging challenge is how to integrate and make sense of a diverse range of data sources, and channel this into a usable form that delivers increased efficiencies and supports increased levels of sustainable production."

The attendance was made up of people from both the agriculture and ICT industries including Teagasc and the farming organisations.

Info Tech can grow agriculture

THE application of Information and Communications Technology in agriculture can transform Ireland's already significant role in global food production, tech experts meeting here have said.

There is a growing movement in agriculture to apply information technologies to improve practice efficiencies and yields.

Waterford Institute of Technology's Telecommunications, Software and Systems Group (TSSG) is linking up with EU Commissioner, Phil Hogan, Teagasc, Glanbia, Keenans and other farming organisations, CEOs and all who want to get involved in EU funding for ICT-agri technology.

The landmark effort to generate industry-wide support for a national strategy encouraging the research and development of real and appropriate ICT solutions for the agri-industry follows hot on the heels of the TSSG's 'Agriculture Think Tank' in February.

Phil Hogan spoke about the global reach of ICT in Agriculture: "ICT technologies are changing the shape of the agriculture industry across the globe, providing improvements in the quality of production of crops, the health of livestock and quality of life for farmers.

DRAMATIC INCREASE

"There has been a dramatic increase in emphasis on consumer protection, continuous quality assurance, natural foods, pathogen-free food, reduction in the use of veterinary treatment and increase concern for care of animals."

By bringing together people from the Agricultural and ICT industries, common opportunities can be identified and

the potential captured as a national strategy geared towards developing an export focused ICT-Agriculture industry, WIT President and TSSG Founder & Director, Professor Willie Donnelly said.

Phil opened the event which Professor Donnelly hopes could be a turning point for Irish agriculture into the future.

Phil Hogan at the ICT Conference

Pictured at Kilkenny Castle at the ICT Agricultural Conference, to place Ireland as a Global leader in Precision Farming are Katherine O'Leary, Farmers' Journal, Phil Hogan and Pat Smith, General Secretary Irish Farmers' Association
