Dear ICT-AGRI-FOOD Community,

As ICT-AGRI-FOOD comes to an end, and this marks our final communication with you all, we want to extend our deepest gratitude to everyone who contributed to this incredible journey. Your dedication, collaboration, and innovation have been the driving force behind the success of the ERA-NET, and none of this would have been possible without you.

While this chapter closes with the conclusion of the ERA-NET, the impact of ICT-AGRI-FOOD will continue. Key initiatives, such as the Knowledge Incubator, will live on and be further developed under the Agriculture of Data Partnership, ensuring that the mission to advance digitalisation in the agri-food sector continues.

Thank you once again for being part of this transformative initiative. The collaboration, knowledge exchange, and innovation sparked by ICT-AGRI-FOOD will continue shaping the future of digital agriculture!

Yours sincerely,
Johannes Pfeifer

A Look Back: ICT-AGRI-FOOD Project Summit 2025

Photo: Participants at the Ict-Agri-Food summit in Dublin, 2025

To mark the closing phase, the **ICT-AGRI-FOOD Summit** was successfully held in Dublin from 4th to 5th January 2025, hosted by Teagasc. The event brought together **over 50 participants**, including researchers, scientists, institutional representatives, and funders from across the EU and beyond. The conference served as a vital platform for discussing how we can drive **sustainable, transparent, and technology-driven agri-food systems**, tackling climate challenges while improving efficiency across the entire value chain. Project teams had the opportunity to showcase their completed and ongoing work, fostering insightful discussions with experts and funding agencies.

ICT-AGRI-FOOD Brochure Now Available!

To highlight the journey of ICT-AGRI-FOOD, a final brochure highlighting all funded and co-funded projects along with the partners who collaborated in this ERA-NET from 2019 - 2025. Over four successful calls, 42 transnational and interdisciplinary projects have been supported, creating collaboration across the agri-food value chain. These projects harness advanced digital tools to address challenges in both conventional and organic farming while considering diverse European climates and production conditions.
