UNPARALLEL Innovation – Portugal

THE PROBLEM...

Where do I discover and inspect detailed use-cases of the Internet-of-Things ?

Where can I find IoT products, from many worldwide manufacturers ?

Where can I study the solutions that solve Internet-of-Things problems ?

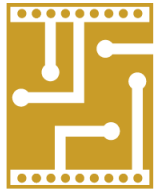

Where can I explore the needs for IoT technologies for my specific application domain (and for others) ?

Where can I identify the problems that are addressed by existing IoT technologies ?

The one-stop-source for Internet-of-Things innovations and technologies to help users (developers/integrators/advisors/end-users) to take the most advantage of the IoT for the benefit of society, businesses and individuals.

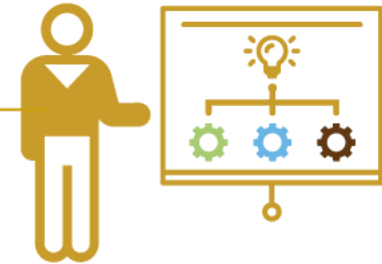

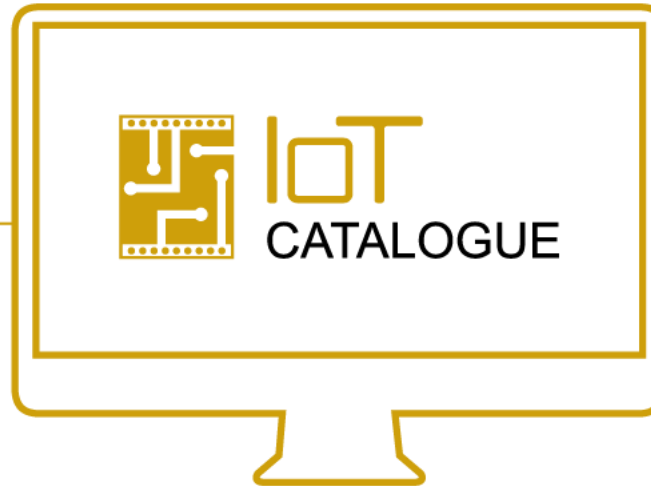

IoT
CATALOGUE

WHO ARE THE TYPICAL CUSTOMERS?

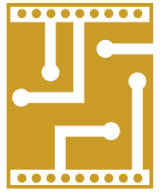

END-USERS

- Information about domain specific problems that benefit from IoT Technologies
- Understand which IoT functionalities create added-value to the end-users
- Explore real-world IoT Solutions

TECHNOLOGY PROVIDERS

- Access to the list of components that compose a product
- Get guidance on how to assemble a product
- Compare prices between stores
- Match products with IoT functionalities

WHAT IS THE ADDED VALUE FOR USE CASES?

Share knowledge

- See the solutions adopt by other Use Cases
- Understand the impact of IoT solutions in the Use Cases
